

Senior Discovery Biologist, Zurich

Are you an outstanding scientist with strong expertise in biology and a proven track record of accomplishments directing drug discovery projects? Would you like to help build a world class drug discovery company?

Rejuveron Lifesciences AG is a company that develops and invests in drugs and technologies which have the potential to significantly prolong human lifespan. Rejuveron aims to find cures for age-related diseases. Our leading experts advance science and technology to help people live longer, healthier lives.

We are seeking a highly motivated and innovative senior biologist with a mission to identify novel drug targets and discover novel therapeutic agents as **Senior Discovery Biologist** in Zurich, Switzerland.

Key Accountabilities/Core Job Responsibilities:

- Conceive, communicate and execute innovative multi-disciplinary research strategies that encompass target validation, small molecule drug discovery and biomarker identification.
- Provide scientific leadership across multiple projects ranging from target identification to clinical candidate selection.
- Experience in phenotypic screening or functional screening.
- Ability to work in cross-functional teams (medicinal chemistry, DMPK, pharmacology, safety/toxicology etc.) and effectively collaborate to drive early projects and ensure execution of the screening cascade.
- Involved in the interpretation and presentation of key data and have the opportunity to propose and initiate new activities to drive forward our discovery efforts.

Qualifications:

- A PhD or equivalent in Pharmacology, Biochemistry or related discipline
- >12 years industry experience in one or more of the following therapeutic modalities: small molecules, biologics, gene therapy, cell therapy, etc. with prior management responsibilities.
- Good knowledge/experience with in vitro assay and in vivo models.
- Excellent communication and organisational skills with the ability to work independently and in a team environment.

Rejuveron offers a competitive compensation package incl. benefits, a thriving workplace with a stimulating environment and the opportunity to broaden your horizon. For consideration, please submit your resume and cover letter referencing the job title to careers@rejuveron.com. Please note that we can only accept applications from people that have a valid EU work permit.
